Ecole Nationale de l'Aviation Civile

ENAC is the leader in ATCo training in Europe. Find all information about our initial refresher & development training offer here.
If you need more information about ENAC ATCo, please contact us ///

**Initial ATC Training**

**BASIC Training**

Our 20-week BASIC course aims at familiarizing trainees with all aspects of Air Traffic Services by covering all subjects required by ICAO and Eurocontrol rules & recommendations.

In order to incorporate this knowledge, trainees will develop technical skills using our « BASIC Tower » and « BASIC Surveillance » specific simulator training programs.

**Aerodrome Control RATING training**

Our 10-week Aerodrome control RATING training course is designed for all students having successfully completed a certified BASIC course.

The course program includes the necessary theory and practice to allow trainees to acquire the required competence in compliance with ICAO and Eurocontrol rules & recommendations.

This course enables students to acquire ADI & ADV RATINGs on the European ATCo Student License and, ultimately, an ATCo Control Tower endorsement.

**Approach Control RATING training**

Our 16-week Approach control RATING training course is designed for all students having successfully completed a certified BASIC course.

The course programme includes the necessary theory and practice to allow trainees to acquire the required competence in compliance with ICAO and Eurocontrol rules & recommendations.

This course enables students to acquire APS & APP RATINGs on European ATCo Student License and, ultimately, an ATCo Control Approach endorsement.

**En-Route Control RATING training**
Our 16-week Approach control RATING training course is designed for all students having successfully completed a certified BASIC course.

The course programme includes the necessary theory and practice to allow trainees to acquire the required competence in compliance with ICAO and Eurocontrol rules & recommendations.

This course enables students to acquire APS & APP RATINGs on European ATCo Student License and, ultimately, an ATCo Control Approach endorsement.

**Refrescher Training**

**ATC Refresher Training Course**

Our 1-week refresher training program includes:

- 2 days for theoretical updates (latest rules, regulations & procedures in coordination with ANSp / client).
- 2 days for Unusual / Degraded & Emergency Situation management using specific ENAC emergency checklists.
- The 5th day deals with a specific topic in the ATM field, as per ANSp / client’s request (latest European developments, customer focus, local recent developments & procedures ...).

This program has been designed to contribute (on periodic basis) to the ATCo Licence re-validation process (subject to negotiation with relevant NSA).

**Development Training**

**OJTI / On-Job-Training-Instructor training course**

This 1-week training course provides the trainees (experienced ATCos) with references and methods to analyze and improve instructor teaching skills.

The course content focuses on two main areas:

- Management of technical and teaching aspects of an instruction session: before, during and after training session.
- Management of psychological and relational aspects of an instruction session.

At the end of the course:

- The trainee will be capable of preparing and managing dual controller training sessions with trainee controllers, including brief and debrief phases.
- Trainees will be able to assess trainee controller performance according to teaching rules and to formulate corrective actions.
- Trainees should be able to adapt their teaching styles to their trainee controllers.

**ATC Supervisor Training**

This 2-week training course provides trainees (senior ATCos) with relevant guidelines that will help them take on their new responsibilities, and focuses on the following aspects:

- Management of psychological and relational aspects linked to OPS room supervision.
- Updated technical knowledge regarding systems the supervisor will be using, along with
reviews of Aviation Law, Search & Rescue procedures, Air Traffic Flow and Capacity Management...

- Specific cross-cultural awareness (ATCO – ATSEP) that will contribute to enhanced OPS-room / Technical supervision coordination

ATC Supervisor training is a 2-step program:

- Step 1: course delivered in Toulouse, including all general elements based on ENAC Generic Supervisor Manual & Checklists, along with aspects specified by initial training audit carried out by ENAC experts.
- Step 2: assistance to implementation phase performed within client organization by French operational supervisors from DSNA (French ANSp).

**Team Resource Management for ATCos**

This 3 day course has been designed for experienced ATCos, ATC instructors, ATC examiners and ATC supervisors.
The course aims to:

- Provide a good understanding of why the human factor is an essential component of safe Air Traffic Control
- Help Air Traffic Controllers understand their role within the system and within their team
- Give an introduction to Threat & Error Management
- Highlight individual and collective mechanisms that may impact safe Air Traffic Control

**Enhanced Cross-cultural training**

**ATCo - Pilot cross culture training**

This course takes advantage of the unique opportunity at ENAC where student pilots & student ATCos share the same campus. Our 3-day program provides ATCo students with an improved understanding of cockpit environment and pilot needs, both in normal operation and in crisis management situations.

**Advanced Master programmes**
