« The greatness of a profession is above all in uniting human beings »

Antoine de Saint-Exupéry

Aeronautics is obviously an international domain. Crossing borders and bringing people together is the purpose of civil aviation. Accordingly, ENAC shares its expertise, trains aviation professionals worldwide, exchanges with the best universities and gives opportunities to its students to benefit from academic or professional experiences abroad.

Academic exchanges

ENAC has partnership agreements with 80 universities worldwide. A quarter of our students come from more than 50 countries around the world. ENAC is one of the most dynamic universities in terms of international relations.

Mobility

International mobility is essential for our students as a means of evolving professionally and as an individual. As a result, ENAC graduate programmes enable and promote international exchange. Each year, more than 180 students carry out internships or professional assignments abroad, in companies or labs all over the world.

Studying at ENAC

Studying at ENAC represents an outstanding opportunity for international students and trainees.

The PEGASUS network, guarantee of European aeronautical excellence

ENAC is a member of the PEGASUS network, gathering the best schools in the aerospace sector in Europe. The PEGASUS network guarantees excellence of teaching and research member institutions. It also acts as a facilitator for academic exchanges (students and collaborative research).

The PEGASUS network (Partnership of a European Group of Aeronautics and Space Universities) gathers the main European aerospace Universities.

Created in 1998 at the initiative of members of GEA (ENAC, ENSMA and ISAE), the network currently has 27 Universities in 9 European countries. PEGASUS universities train the vast majority of the 2000 students in aerospace who are graduated annually in Europe.

Its objectives are:

- To enable companies to better understand and appreciate the quality of training provided in other countries than their own by issuing the Pegasus certificate that guarantees the high level of training completed
- To incorporate the European dimension and recognition of international experience into training by delivering a Pegasus award to students who have spent at least 5 months abroad as part of their university course
- To certify the quality and adequacy of programmes delivered in Aerospace with regards to the needs and standards for industry and research through the PERSEUS label
