Ecole Nationale de l'Aviation Civile

[Research programs](#)

Cross-disciplinary ENAC research programs aim to create a synergy between the professional expertise in air transport and academic excellence of ENAC laboratories and departments, via the implementation and supervision of multi-disciplinary, innovation generating projects and research platforms in the air transport system engineering sector. ENAC programs deal with their research topics and cross-disciplinary development focusing on "professional" issues, in direct partnership with major aeronautics stakeholders in Europe and worldwide.
