French National School of Civil Aviation addresses the growing demand of high-skilled personnel for Civil Aviation in South-America with a new partnership with Brasil

On June 23, 2018, at ENAC, the National Secretary of Brazilian Civil Aviation, Dario Rais Lopez, and the deputy Director General of ENAC, Philippe Crebassa, signed in Toulouse a cooperation agreement to implement two Advanced Masters in Brazil.

ENAC will train managers and executives from the three main agencies of the Brazilian Federal State: the National Secretary of Civil Aviation (SNAC), the National Agency for Civil Aviation, (ANAC), and Infraero (the public operator of airports not under private concession).

These two Masters will consist in a common core content and two specialised tracks: one general about the air transport industry, one focused on air navigation services. The objective is clearly to boost capacity building within these organisations, in a challenging environment: development of the 600 secondary airports, modernisation of the air traffic control services, and enhancement of the education framework.

A first batch of 50 participants will be enrolled end of 2018 in Brasilia.

“It’s a privilege to support such a great aeronautical country as Brazil. It is also a major milestone for ENAC international development as these Advanced Masters will be the very first training programmes which we will be delivering in Latin America. We have been working hard for 4 years on this project and it is today a great reward for staff commitment in Toulouse and Brasilia”, Philippe Crebassa said.

The École Nationale de l’Aviation Civile (ENAC), the school of the Direction Générale de l’Aviation Civile (Civil Aviation Authority, or DGAC) under the supervision of the French Ministry of Ecological and Solidarity Transition, combines education and research in aeronautical engineering, air navigation and aircraft piloting.

Every year ENAC admits over 2000 students who are enrolled in more than 30 programmes of study, and 3500 trainees enrolled in continuing education programmes.
ENAC’s 23,000 graduates can be found in some 100 different countries on all 5 continents – proof of the school’s international influence. Its scale and its human and pedagogical resources make ENAC the leading European school of aeronautics today. For more information, visit: www.enac.fr.
