ABOUT STAC

The Civil Aviation Technical Centre (STAC) provides its technical expertise and support on airports and aeronautical matters to the French NSA.

The remote tower project

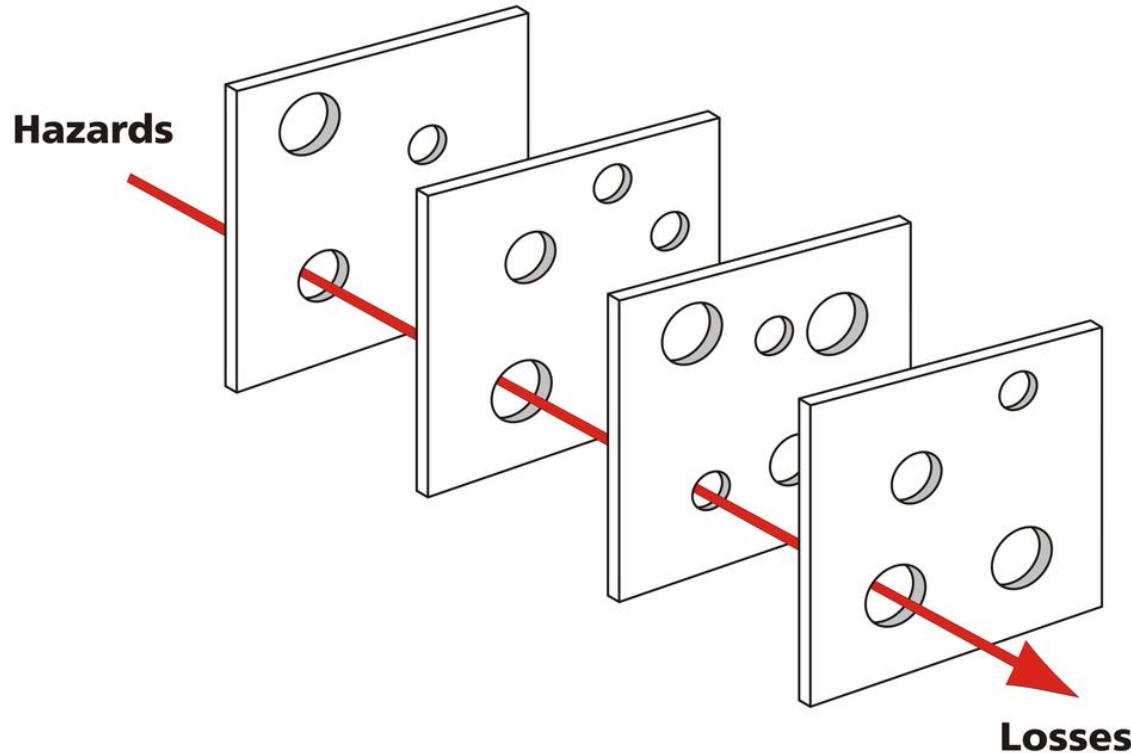

Why ?

- Increase safety ?
- Reduce cost ?

Temporary/Permanent ?

Oversight of safety related changes

Handling of break down

Unfortunately, it will break down!
=> Check realistic procedures to detect and work around failures.

The link (S)

Frame per second

Possible use of a matrix of requirements as in ED240

Typical resolution vs FPS tradeoff

Opportunity 1: review of ICAO requirements

ICAO requirements are based on local tower.
Remote Towers push a review of them.

Some implicit requirements are not written:
⇒ Coordination with airport operator.

ED240 put current requirements in question:
=> The OTW view as lower requirements than the ATCO eyes.

Opportunity 2: take benefit from the research done on RT

The RT concept is a unique opportunity to develop research on ATC at aerodromes.

We may have fortuitous benefits on:

- Training;
- Augmented vision;
- Safety nets;
- ...
